- Interested in gaining work experience

DART

Dart Scholar

[dartscholar.ky](http://dartscholar.ky)

The Dart Scholar programme is designed to foster academic excellence in maths and science through financial support, work experience and mentoring by Dart employees.

## Dart Scholar High School Scholarship

Two scholarships are available each year to students entering Grade 9 (Year 10).

Providing academic criteria are met, each scholarship will be awarded for four continuous years at the recipient's high school of choice in the Cayman Islands.

## The Scholarship Includes:

- Payment of all school fees for a period of four years at the school of choice
- Additional funds for books and uniforms
- Enrichment activities
- Dedicated commitment of time by mentors to assist with schoolwork, promote academic excellence and discuss career interests
- College fund that builds over duration of the scholarship

## Mentorship Programme

The Dart Scholar mentoring component is focused on academic and job mentoring through encouragement of excellence in maths and science.

Scholars will be matched with a Dart employee who will provide them with support and direction as they progress through their education and gain work experience.

Over the course of the four-year mentorship, scholars will be offered assistance in career choice, college or university selection and application process.

## Enrichment Opportunities

The Dart Scholar programme, in association with its sister programme, Minds Inspired, also provides enrichment activities throughout the year.

These activities may include participation in local and overseas educational events such as field trips, academic competitions and work experience. Events will be selected according to the scholar's interests and programme schedule.

Through enrichment, scholars are encouraged and supported in making connections with local and international organisations that promote learning in maths and science.
